SUMMARY OF QUALIFICATIONS

- Three years of proven cross-cultural leadership experience with effective product management, public engagement and teamwork, demonstrated through multiple internships, peer-reviewed publications and co-founding experiences.
- Strong motivation and capability in navigating ambiguity at work, proven via multiple 0→1 MVP executions and initiations of cross-departmental communication during past internships in start-up, MNC and research lab.
- Proficient in User Centered Design (UCD): User research, mixed method usability testing, prototyping high and low fidelity, video prototyping, wireframing, storyboarding, building user personas, prototyping with vibe coding.
- Programming: C# (moderate), C/C++ (moderate), Python (moderate), SQL (beginner), Excel VBA (beginner), Java (beginner).
- Languages: English (Bilingual), Mandarin (Native), Singlish (Dialect).

EDUCATION

University of Washington (UW)

Sep 2025 – Jun 2027

Master of Science - Human Centered Design & Engineering (HCDE)

- GPA - 3.9 / 4
- Relevant coursework: Theoretical Foundations of HCDE, User-Centered Design, Usability Studies, Qualitative Research Methods, Physical Computing and Prototyping, Design and Prototyping with AI, Directed Research Group (VR games design for neurodivergent users)

National University of Singapore (NUS)

Aug 2021 – Jun 2025

Bachelor of Engineering - Computer Engineering (CEG)

- GPA - 4.55 / 5 (Highest Distinction Honors)
- Relevant coursework: CEG Final Year Capstone Project, Machine Learning, Database System, Computer Network, Real-time Operating System, Software Engineering & Object-Oriented Programming, Design Thinking, Interaction Design, Social Psychology of New Media, Quantitative Reasoning with Data

RELEVANT EXPERIENCES

New Product Management (NPM) Intern, Micron Semiconductor Asia, Singapore

July 2024 - Dec 2024

- Managed a team of two interns in developing a unified Tableau dashboard for departmental data access during new product planning, reducing data retrieval time by ~75%.
- Initiated contact with three cross-departmental employees in gaining access to and learning about the company's backend databases, shortening the project duration by ~50%.
- Facilitated cross-departmental collaboration by creating a centralized documentation that streamlined access and provided overviews to three key databases.

Assistant to Chief Executive Officer, FingerDance PTE. LTD., Singapore

Jun 2023 – Jan 2024

- Drove product advocacy with two employees for the company's two-way LLM-based sign language translation app at major events like Asia Tech X Singapore, establishing connections with over 300 customers in two days.
- Engaged with two Singaporean ministers in product demos, securing collaboration with Singapore Association for the Deaf (SADeaf) to train a localized sign language LLM for over 500,000 local mute/deaf members.
- Organized one sign language data collection workshop with six Singaporean mute/deaf stakeholders, in collaboration with SADeaf, collecting over four hours of video data of Singaporean sign language.

Product Manager, A-plus PTE. LTD., Singapore

Dec 2022 - Oct 2023

- Recruited and led two engineering and architecture students from Japan and China in building a desktop- and VR-compatible e-learning platform MVP with Unreal Engine and Blender, used to host three language exchangers at the Kasugai City 80th Anniversary event.
- Engaged in one B2B presentation with Nippon Telegraph and Telephone (NTT), securing collaboration with four Japanese high schools and universities.

ADDITIONAL EXPERIENCES

Co-founder, YI KUAN SPORTS PTE. LTD., Singapore

Jun 2025 - Aug 2025

- Designed and launched two mixed-reality sports class pilots at Singapore's National Stadium, gathering early user feedback from 10 participants to refine the product concept and sports curriculum.
- Drove early go-to-market outreach, initiating partnership discussions with three local schools at secondary and tertiary levels and Singapore's Minister of Education to explore adoption of mixed-reality sports programs in formal PE settings.

Human Computer Interaction (HCI) Researcher, Synteraction (NUS-HCI) Lab, Singapore

Jun 2022 - Jun 2025

- Managed an international hybrid team of five undergraduate and PhD researchers in developing a multimodal AI-assisted search system MVP on smartglasses from 0→1, leading to a first-author peer-reviewed publication presented to 100+ HCI researchers at the 2025 MobileHCI conference in Melbourne.
- Drove the design and execution of 14 user studies and two MVP applications on smartglasses from 0→1 across two international research teams, leading to two peer-reviewed publications.
- Led a hybrid team of four international students from engineering and design backgrounds in the 2022 Huawei Smartglasses Development Hackathon, earning the Most Creative Award as the only undergraduate team.
- Directed over 40 Chinese participants in their 0→1 smartglasses prototyping processes at a hybrid smartglasses hackathon in Zhejiang University, China, helping three teams attain a prize in the end.
